Ms. Chris Alt
Heron Manufacturing, Inc.
121 Tech Drive
Sanford, FL 32771

Re: Project 9126323 - ANSI/NSF Standard 61

Dear Ms. Alt,

This letter acknowledges that NSF International has received the application of Heron Manufacturing, Inc., Sanford facility, for an update to your current certification to ANSI/NSF Standard 61. Heron Manufacturing, Inc. has submitted an update for Certification Services for the following products to be added to your current listing:

Cylinlock 843 / Cylinlock 34323 / Cylinlock 846 / Cylinlock 824 / Cylinlock 845

NSF International has not made any determination whether the above named products can be Certified against ANSI/NSF Standard 61. At this time, these products are not NSF Certified and are not authorized to bear the NSF Mark. If Heron Manufacturing, Inc. obtains Certification of these additional products, an NSF updated Official Listing will be issued and the Certified products will appear immediately in the Internet Listings at www.nsf.org, and in the next publication of the NSF Drinking Water Additives Listing Book.

At this time, the products are undergoing toxicology review to determine the complete formulation and proper testing needed to obtain NSF Certification.

This letter remains accurate for no longer than 120 days from the date of this letter, and may be copied and distributed only in its entirety, with no representation that these products are Certified. Your customers may contact me directly at (407) 730-7715 or check the listings on our Internet home page www.nsf.org to learn whether these products are or are not Certified.

Sincerely,

A handwritten signature in black ink that reads "Holly J. Barton".
